About Me

I'm an enthusiastic and detail-oriented Junior Frontend Developer with approximately one year of experience. I am seeking an entry-level position to contribute to the growth of the company and further my personal development.

Education

React
The Rolling Scope School (July 2024 - Sept. 2024)

Frontend JavaScript developer   certificate
The Rolling Scope School (Nov 2023 - June 2024)

Specialist degree in Foreign Languages
Yuriy Fedkovych Chernivtsi National University (2004)

Bachelor's degree in Finance
Bukovyns'kyy Derzhavnyy Finansovo-Ekonomichnyy Universytet (2004)

Work experience

- **Trainee frontend developer**   11.2023 - 06.2024
  - **Star Wars Hero Search Application:** Implemented React-routing for navigation, used Redux Toolkit Query for API calls and caching, and utilized Context API for theme control.
  - **eCommerce Application:**
    Gained experience in team development and project management with Scrum and Kanban.
    Used GitHub for project task management.
    Utilized commercetools API for product management.
    Developed a detailed product page and implemented add/remove product functionality.
    Stack: React, TypeScript, Vite, MUI.
  - **Car Racing Game:** Developed a SPA for managing a collection of cars and their engines, and demonstrating race statistics. Used Fetch API for server communication and asynchronous tasks.
  - **Fun Chat:** Implemented an interactive chat application for real-time messaging using the WebSocket protocol.
  - **Puzzle Game:** Practiced using TypeScript, Vite, ESLint, Prettier, and Husky for pre-push/pre-commit hooks.
  - **Nonograms Game:** Designed and developed a mini-game using JavaScript, HTML and CSS.
  - **Coffee Shop:** Created a responsive two-page website using HTML, CSS, responsive layout, and JavaScript.

- **Entrepreneur in trade**   2000-2023
  I honed skills in responsibility, punctuality, attention to detail, interpersonal communication, and conflict resolution. Seeking new, exciting, and inspiring challenges and opportunities for growth, I decided to leave the trade industry and dedicate myself to studying and developing my skills in frontend development.
